

UX Designer/Developer

Lindab Innovation Hub is a centre for innovation, supporting Lindab in its mission to provide a better and healthier indoor environment to people. We believe that commitment, attitude, entrepreneurship, and cooperation are the basic ingredients for innovation. And by bringing together the right mix of people, with different know-how, sharing the same vision, and with similar values, extraordinary things happen.

Are you eager to start shaping a healthier indoor environment? Are you a curious and prestigeless team player who enjoys working in an agile environment? Come join us!

Job Description

App development and maintenance for both iOS and Android within Lindab. Deployment, bug fixes and administration of Lindab's Google Play and Apple AppStore accounts. Your tasks also include UX/UI experiments at the forefront of understanding our customer journeys and developing UX interfaces for Indoor Climate together with our Innovation team. This position also includes being contact and supporting the R&D departments in the product development process where products meets digital services. This person also work closely with our development teams to help bring the designs to life and ensure that all solutions are not only usable, but also innovative and awardwinning.

In this position, you will:

- Contribute to creating solutions that help improve indoor air quality and ultimately creating a healthier and more productive indoor climate
- Develop, maintain and bugfix Lindab mobile applications.
- Responsible for deployment and release of mobile apps in Google Play and Apple AppStore in cooperation with Lindabs software development team.
- Build relationships with our customers by learning first-hand about their workflows, their needs and pain points
- Close cooperation with R&D centers for developing apps which are control "smart products" or Lindab products which should interact with mobile apps such as Ultralink Bluetooth.

Explicitly as member of the Innovation Team:

- Participate during the entire innovation process, where you will develop prototypes, design concepts, visualize detailed UI designs and contribute to creating an excellent user experience for our users
- Own the user experience of our products and services: develop insights about the intended users, create interaction concepts, attend to the details of the look and feel, plan and run validation studies
- Develop and present documentation, user flows, wireframes, and interactive prototypes

Qualifications

We hire people for who they are and for their attitude to learn and share with others. If you enjoy challenges, few guidelines and have the drive to create something new, you are probably the right person for the job.

For this position, the following requirements apply:

- University-level education with a focus on system development for mobile apps and visual design or a related field.
- Fluency in Swedish and English.
- At least two years of experience of App Development
- UX Design experience including ability to create and present deliverables, such as interaction design concepts, visual design mock-ups and wireframes
- Strong interest and/or experience in working with user research.
- Driven, resourceful, curious and communicative, not afraid to try new ideas.

Assets

Most of all, we are looking for an open, passionate person who shares our values, is a true team player, have focus on our customers and will enjoy working with the rest of us at Lindab.

In addition, we consider it an asset if you also:

- Speak more languages than those required above
- Have interests after work, such as sports, music, animals, singing etc
- Have experience with other cultures
- Preferably have some visual design experience
